

AMINO RESIN COMPOSITION FOR MOLD CLEANING

ABSTRACT

The present invention provides an amino resin composition for cleaning molds, that said
5 composition is made of a thermosetting resin to which is a semi-cured amino resin composition or a
semi-cured mixture thereof is added. The amino resin composition has decreased viscosity and
increased tablet ability. When used to remove the soil on the surface of molds, the amino resin
composition possesses good forming ability and good mold-cleaning effect so that the time needed
for mold cleaning is efficiently decreased and the problem of a powder composition that can not be
10 easily tabletted is overcome due to its excellent tablet ability.
